

Computing & Networking infrastructure at JINR: status and plans

Vladimir Korenkov (JINR, Dubna)

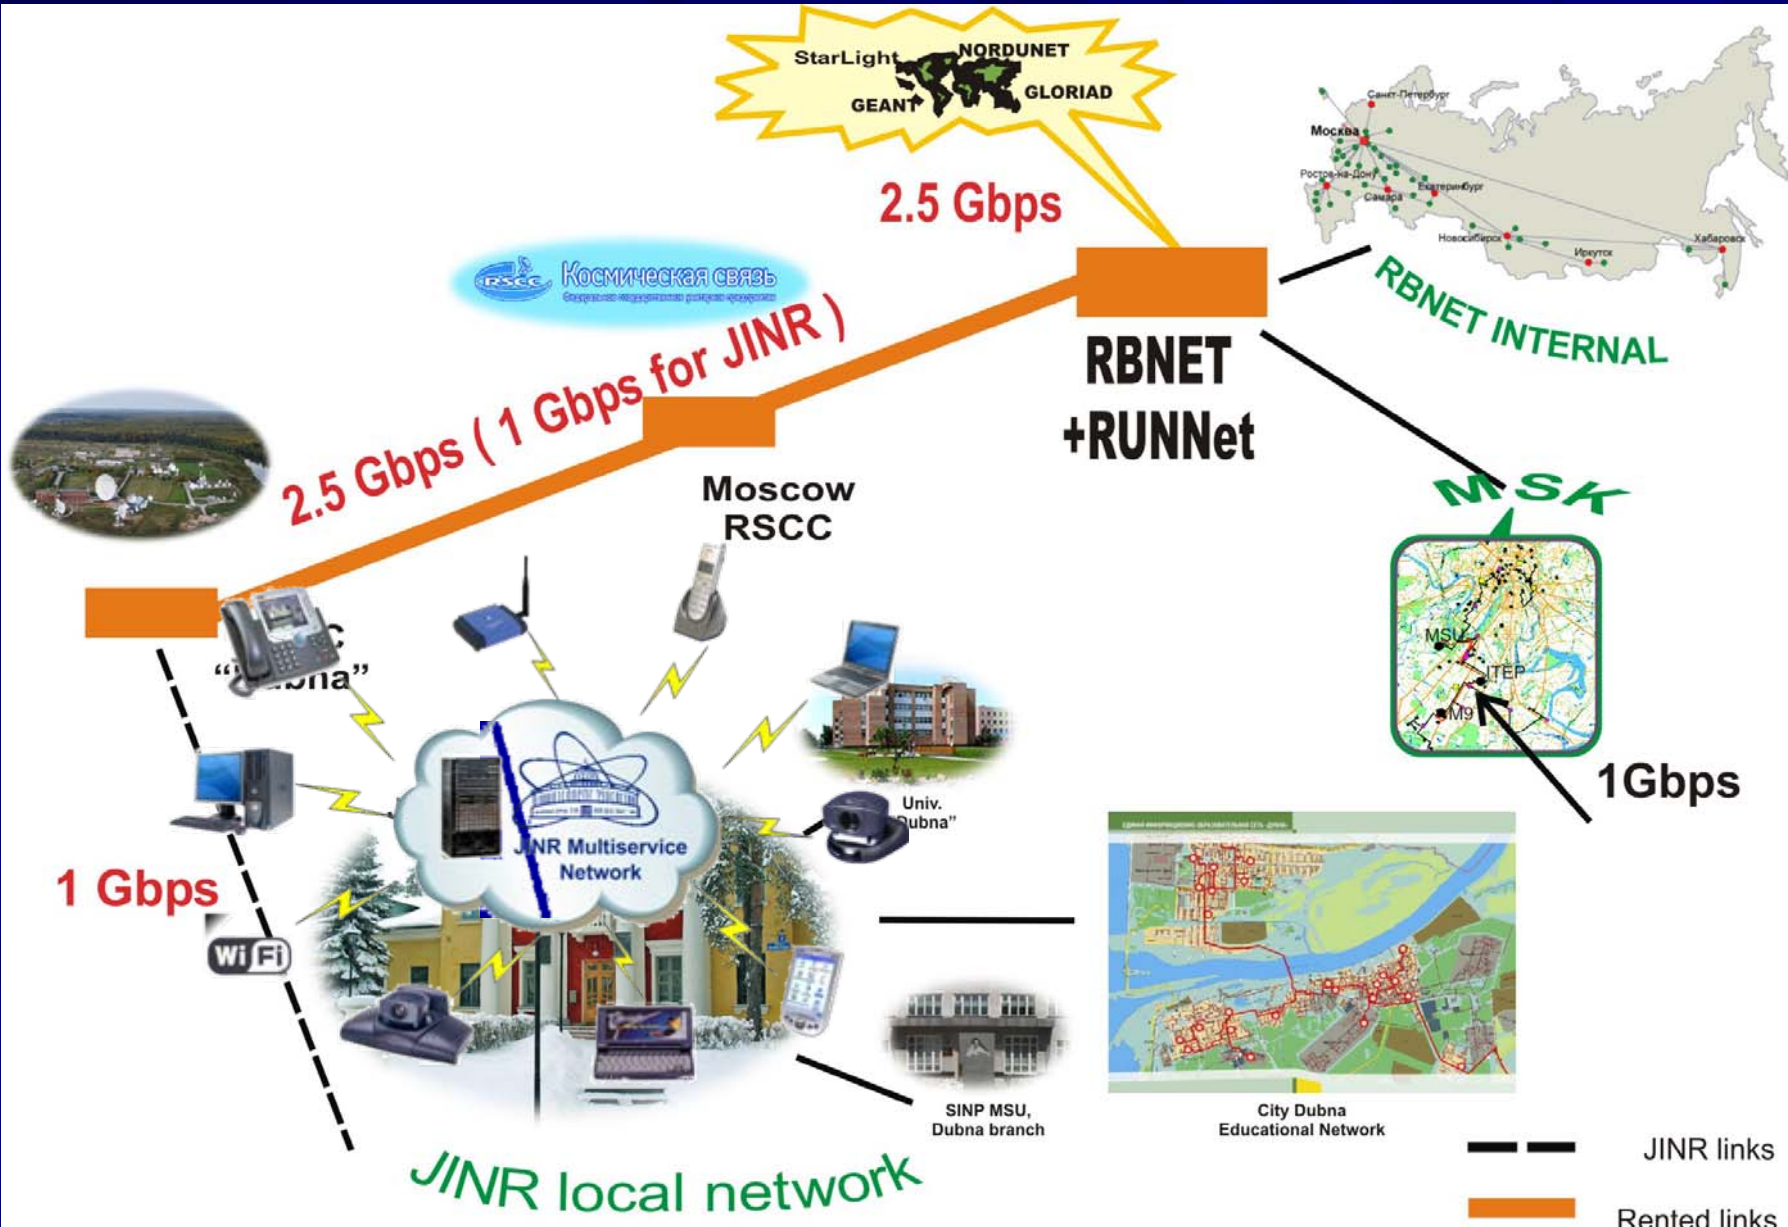

*Neutrino physics at accelerators
Dubna 24 January, 2008*

A necessary level of all the elements of the JINR telecommunication, network and information infrastructure should be provided:

- High-throughput telecommunication data links,
- JINR local area network (LAN) backbone,
- Central computer complex and Grid segment,
- Software support of experiments.

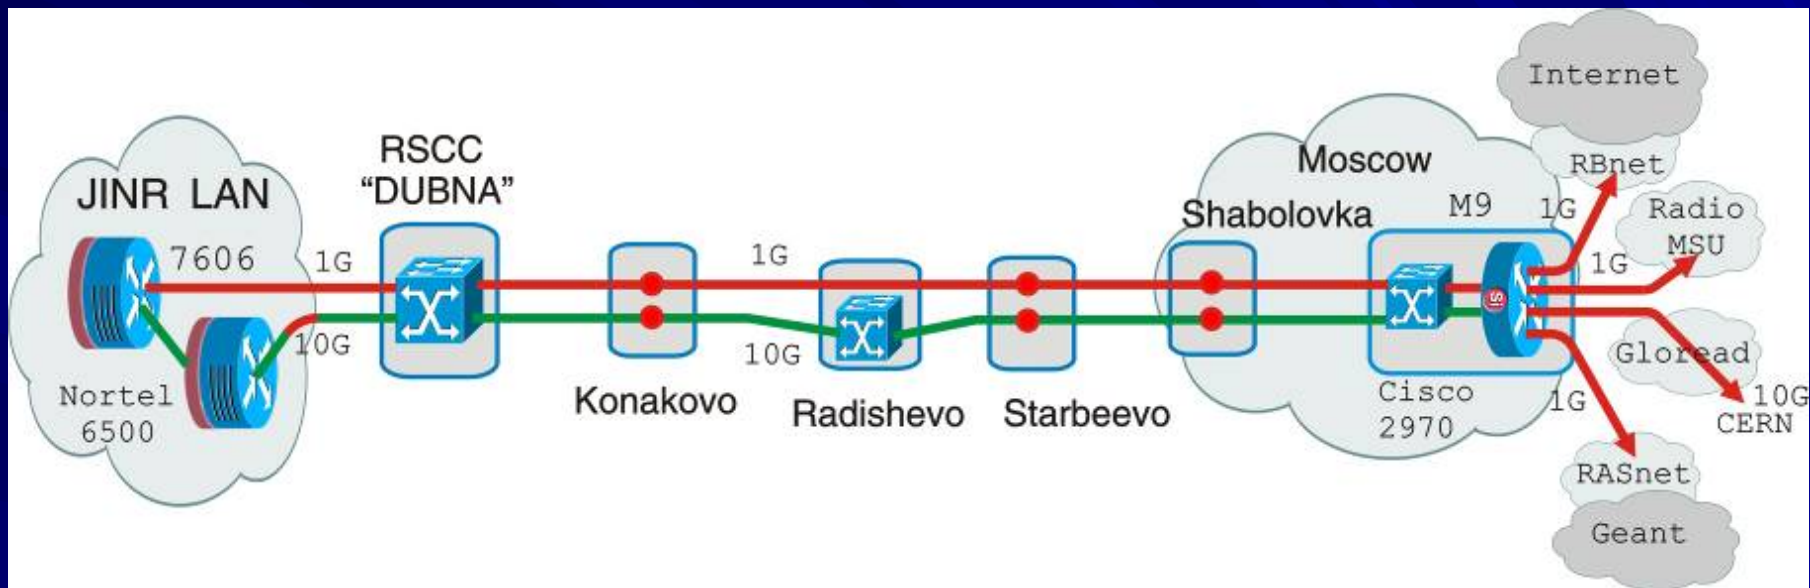

Current Status of External Network Communications at JINR

--- JINR links
 — Rented links

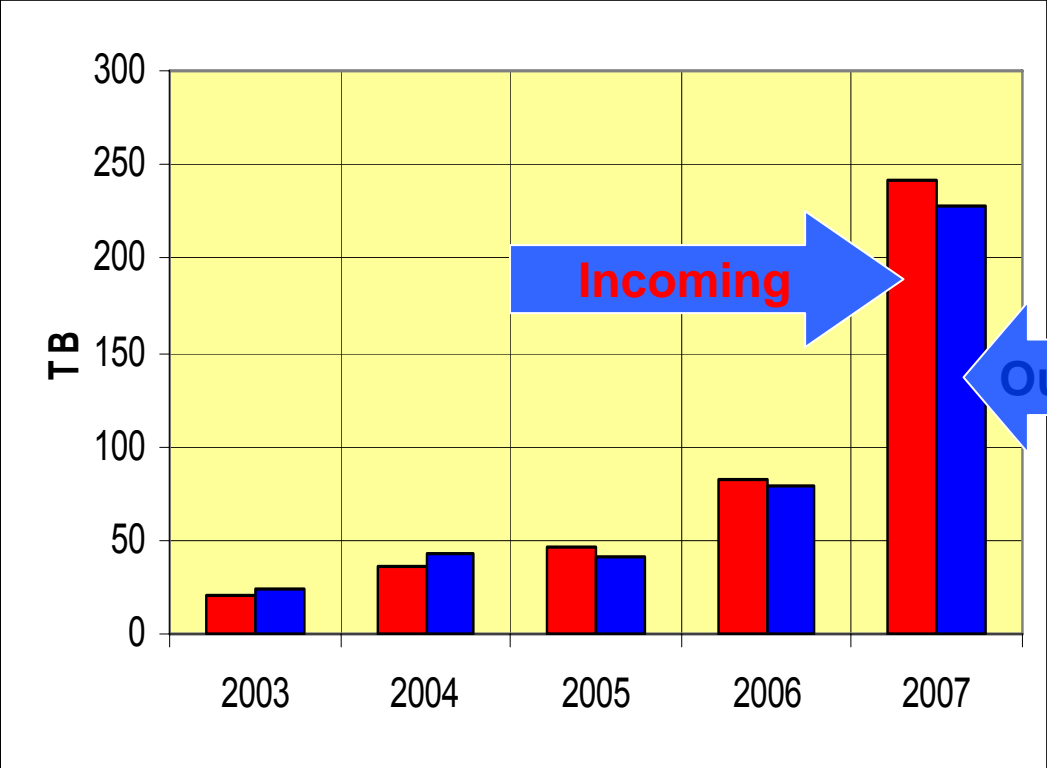

Telecommunication channels N*10 Gbps construction

Upgrade of Dubna-Moscow data link up to 10 Gbps in 2007 and up to 40 Gbps in 2010.

Network Monitoring: Incoming and outgoing traffic distribution

- **Total:**
incoming in 2007 – 241.9 TB,
outgoing -227.8;

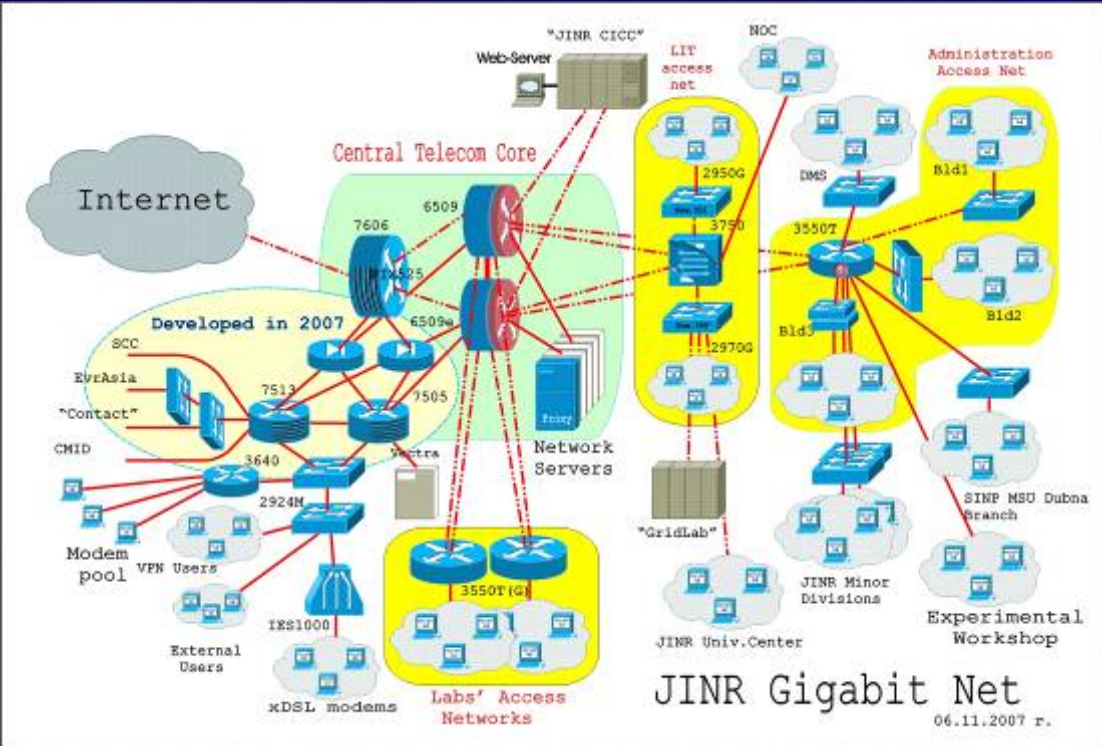

- **Most of traffic:**
CERN (88.8%),
DESY, INFN, SARA, IN2P3

- 47 local sub-networks;
- Local traffic – 77.6 TB

- **Created in 2007:**
 - direct point-to-point data channel between JINR LAN and CERN as part of the JINR program of participating in LCG in CERN;
 - Dubna-City Internet eXchange.

JINR Local Area Network Backbone (LAN)

- **Comprises 5880** computers and nodes,
Users - 3322
Modem pool users - 689
Remote VPN users (Lanpolis, Contact, TelecomMPK) - 500;
- **High-speed transport (1Gbps)** (**Min. 100 Mbps to each PC**);
- **Controlled-access** (Cisco PIX-525 firewall) at network entrance;
- **Partially isolated local traffic** (8 divisions have own **subnetworks** with Cisco Catalyst 3550 as gateways);
- **General network authorization** system involves many services (AFS, batch systems, Grid, JINR LAN remote access, etc.

- **Plans:**
- **Step-by-step modernization of the JINR Backbone – transfer to 10 Gbps**
- **Development and modernization of the control system of the JINR highway network**

JINR Central Information and Computing Complex (CICC)

670 kSi2K

100 TB Disk

The JINR Central Information and Computing Complex (CICC) is the element of Russian GRID Segment used for LHC computing and for the other applications.

**Contract prepared in Dec 2007:
SuperBlade – 2 BOX
40 CPU Xenon 5430 2.66 GHz Quad
Core ~ 400 kSi2K**

**Total expected in March, 2008 -
1070 kSi2K**

CICC comprises:

53 servers

7 interactive nodes

60 4-core computing nodes, Xeon 5150, 8GB RAM.

6 2-core computing nodes, Athlon , 2GB RAM, Mirynet.

Site name: JINR-LCG2

Internal CICC network - 1Gbit/sec

Operating system - Scientific Linux 4.4,
Scientific Linux CERN 4.5;

Middleware version GLITE-3.1

File Systems - **AFS** (the Andrew File System) for user Software and home directories is a world-wide distributed file system. AFS permits to share easily files in an heterogeneous distributed environment (UNIXes, NT) with a unique authentication scheme (Kerberos).

dCache- for data.

User registration system - **Kerberos 5** (AFS use Kerberos 5 for authentication)

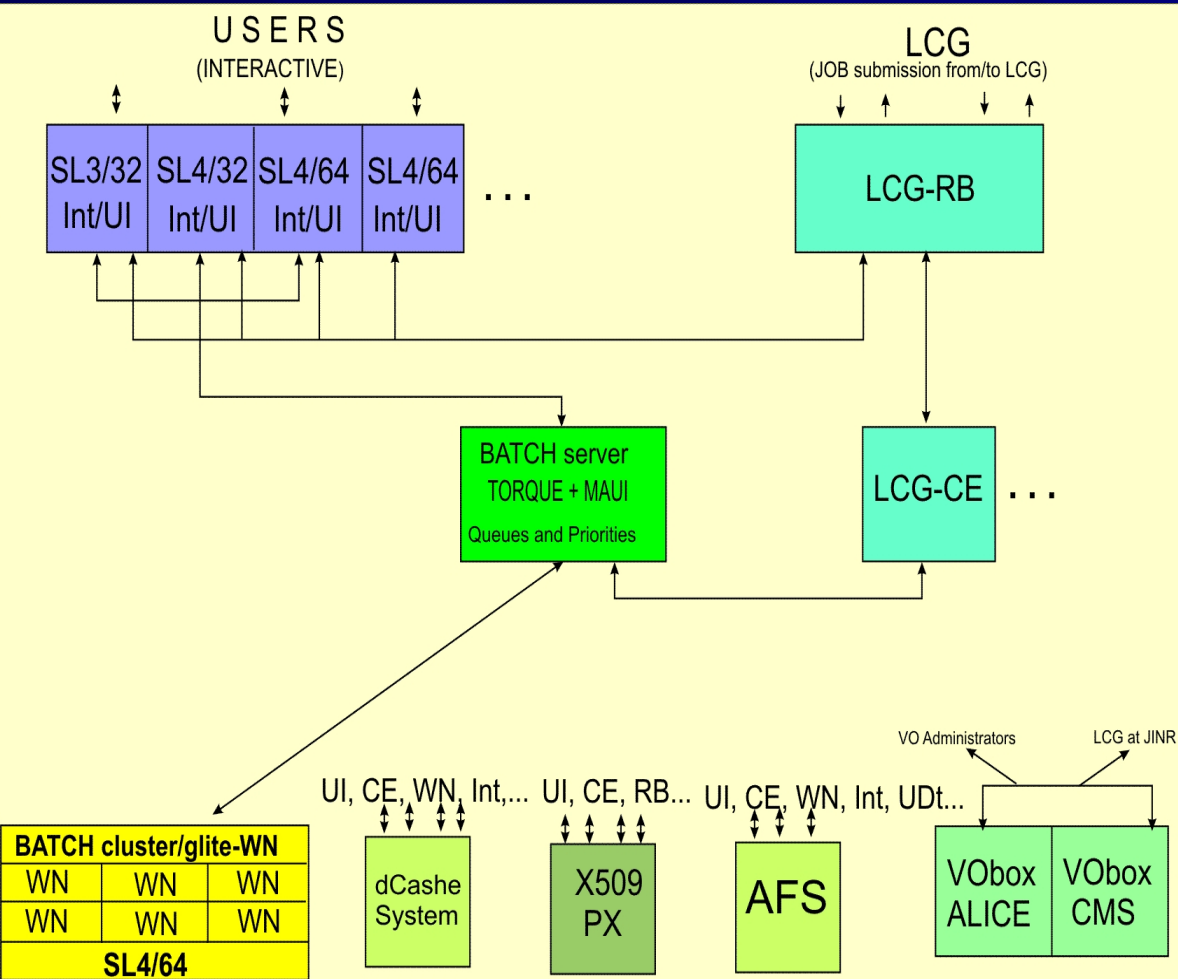

JINR Central Information and Computing Complex (CICC)

June 2007, the CICC resources and services have been integrated into a unified information and computing structure

SL3/32 Int/UI - Interactive nodes/User Interface at 32-bit architecture with SL3,
SL4/32 Int/UI - Interactive nodes/User Interface at 32-bit architecture with SL4,
SL4/64 Int/UI - Interactive nodes/User Interface at 64-bit architecture with SL4,
LCG-RB - LCG Resource Broker,
LCG-CE - LCG Computing Elements,
WN - Worker Nodes,
X509 PX - Proxy,
VObox - special node where experiments (ALICE, CMS, etc.) or Virtual organizations (VO) can run specific agents and services to provide a reliable mechanism to accomplish various tasks specific for VO,
AFS - AFS servers,
dCache - dCache servers (82 TB)

JINR WLCG infrastructure

JINR provides the following services in the WLCG environment:

Basic services - Berkley DB Information Index (top level BDII); site BDII; Computing Element (CE); Proxy Server (PX); Resource Broker (RB); Workload Management System + Logging&Bookkeeping Service (WMS+LB); RGMA-based monitoring system collector server (MON-box); LCG File Catalog (LFC); Storage Element (SE), dCache 82 TB;

Special Services - VO boxes for ALICE and for CMS; ROCMON;
PPS and testing infrastructure - Pre-production gLite version;

Software for VOs: dCache xrootd door, AliROOT, ROOT, GEANT packages for ALICE; ATLAS packages; CMSSW packages for CMS and DaVinci, Gauss packages for LHCb.

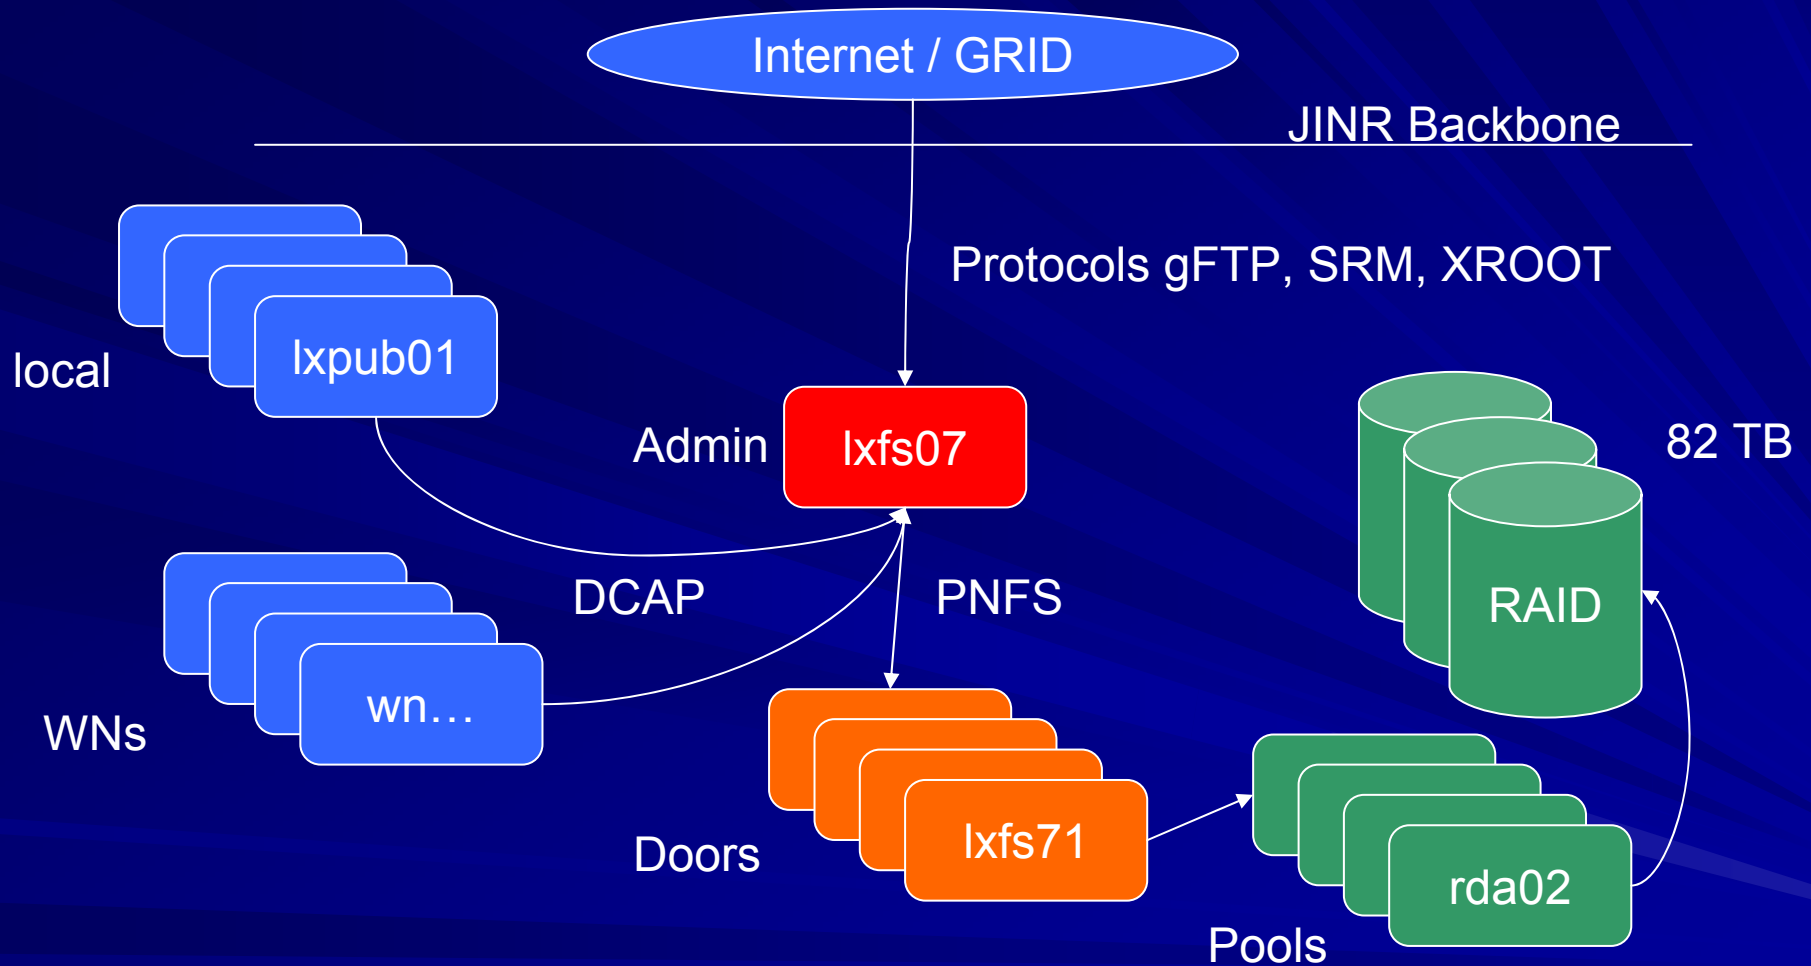

Grid Virtual Organizations at JINR CICC: June-December 2007

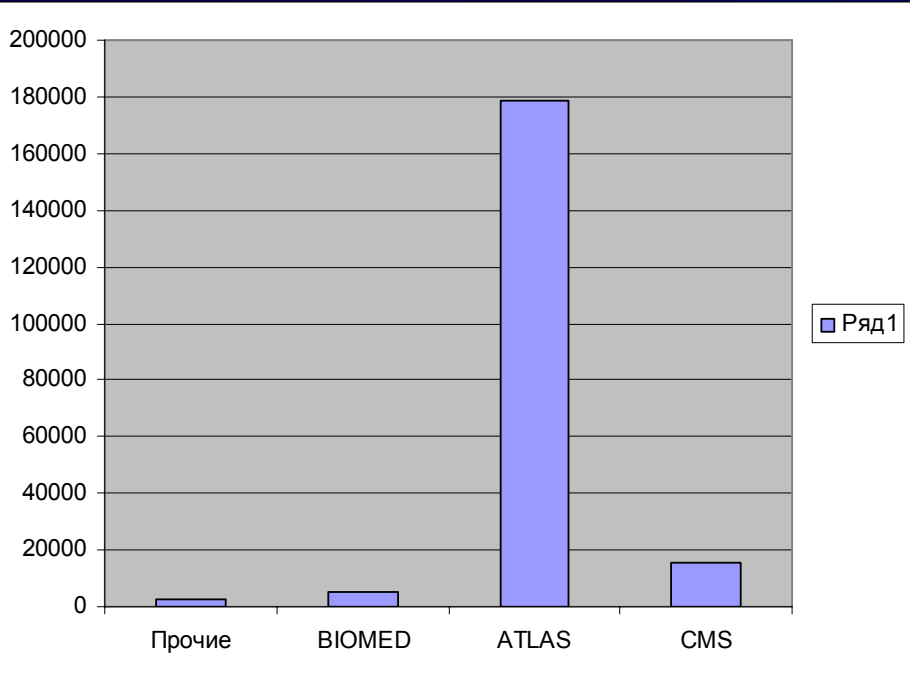

Grid VO	Jobs number	CPU time (kSi2k*hours)
ALICE	90 441	1 370 820.40
ATLAS	15 643	48 980.43
CMS	52 249	51 883.18
LHCb	10 484	6 604.50
BIOMED	25 103	164 102.07
FUSION	9 208	145 053.80
Others (ops, dteam, hone)	17 665	47 022.10
TOTAL	220 793	1 834 466.49

dCache in JINR

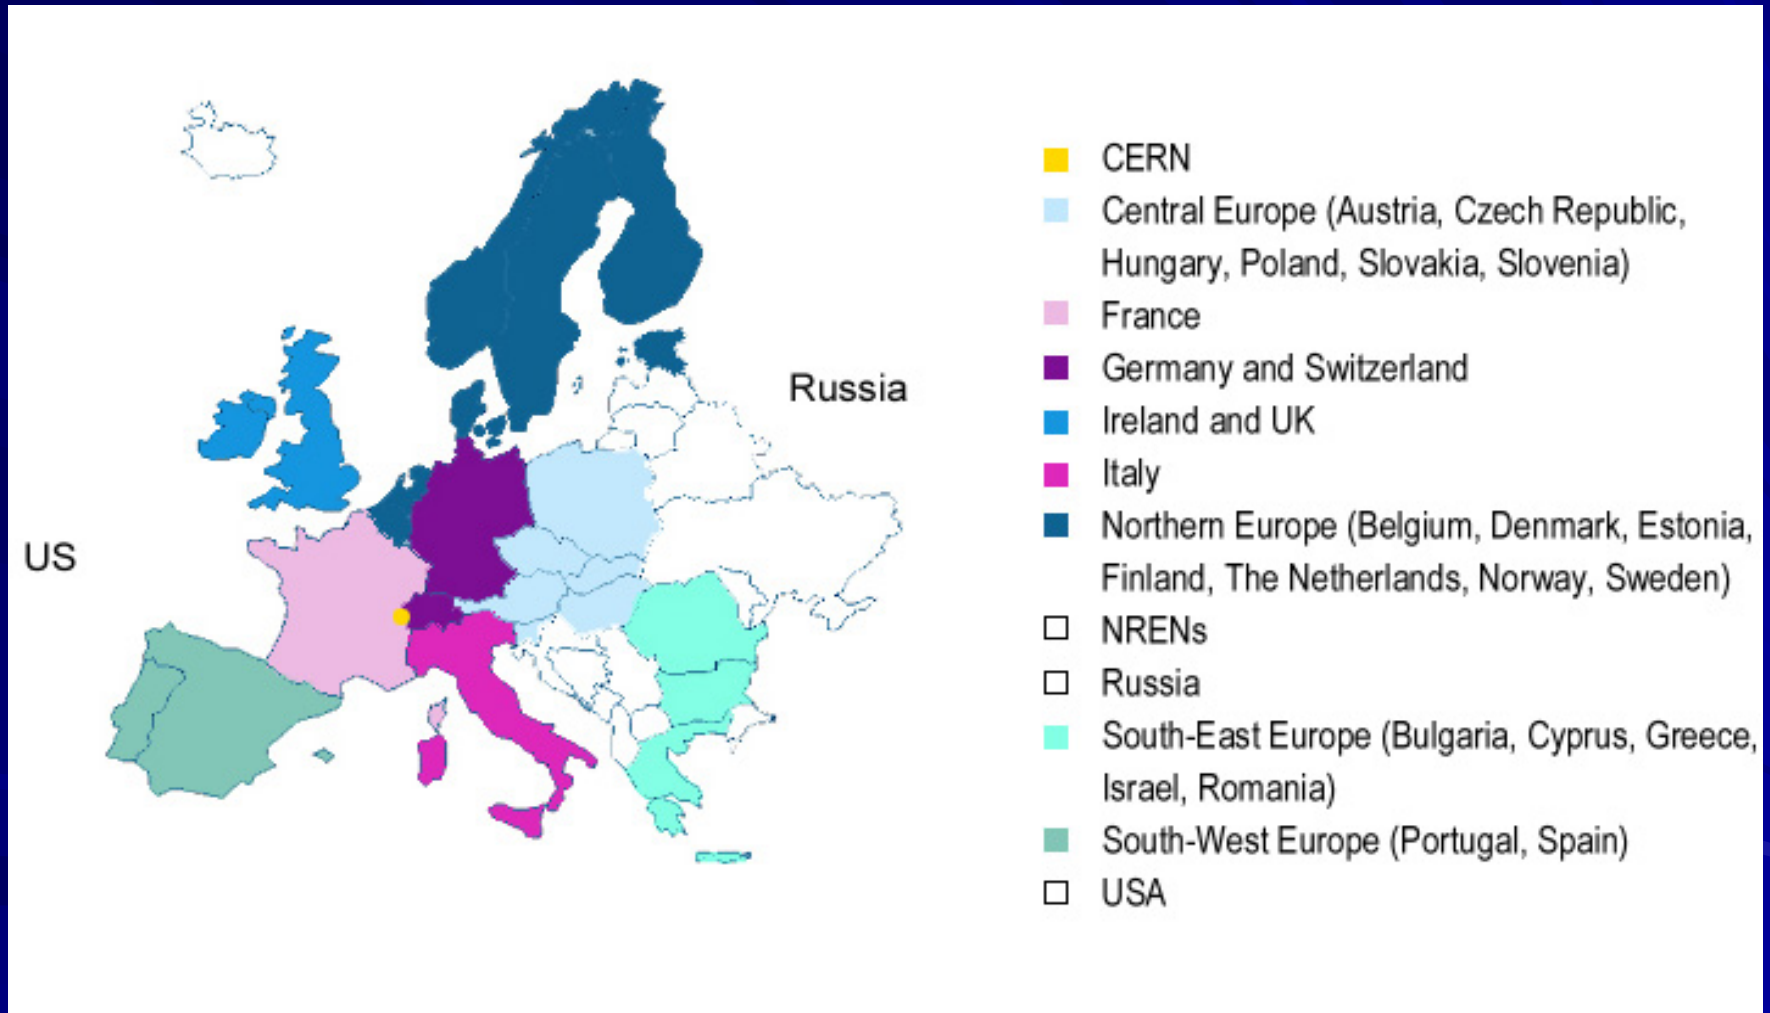

dCache: Files, VO, Discs

Files

EGEE (Enabling Grids for E-scienceE)

EGEE

Enabling Grids for E-science

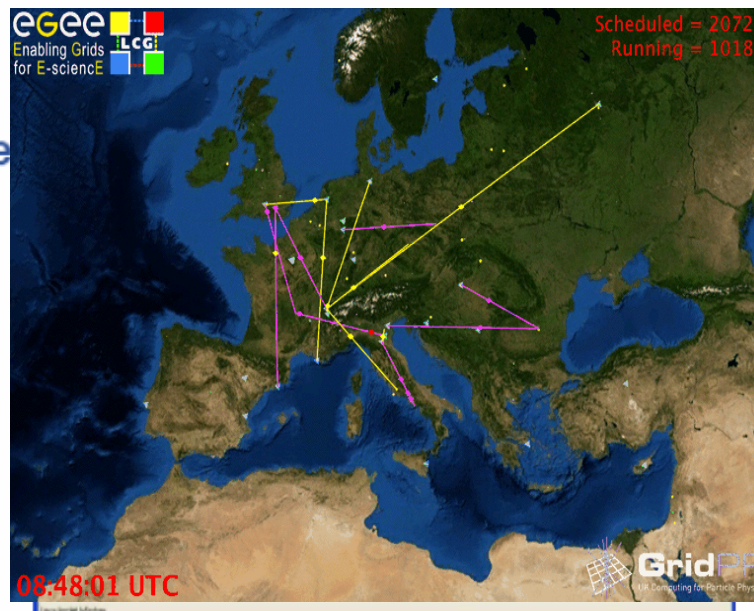

EGEE

- Flagship European grid infrastructure project
- Now in 2nd phase with 91 partners in 32 countries

Objectives

- Large-scale, production-quality grid infrastructure for e-Science
- Attracting new resources and users from industry as well as science
- Maintain and further improve gLite Grid middleware

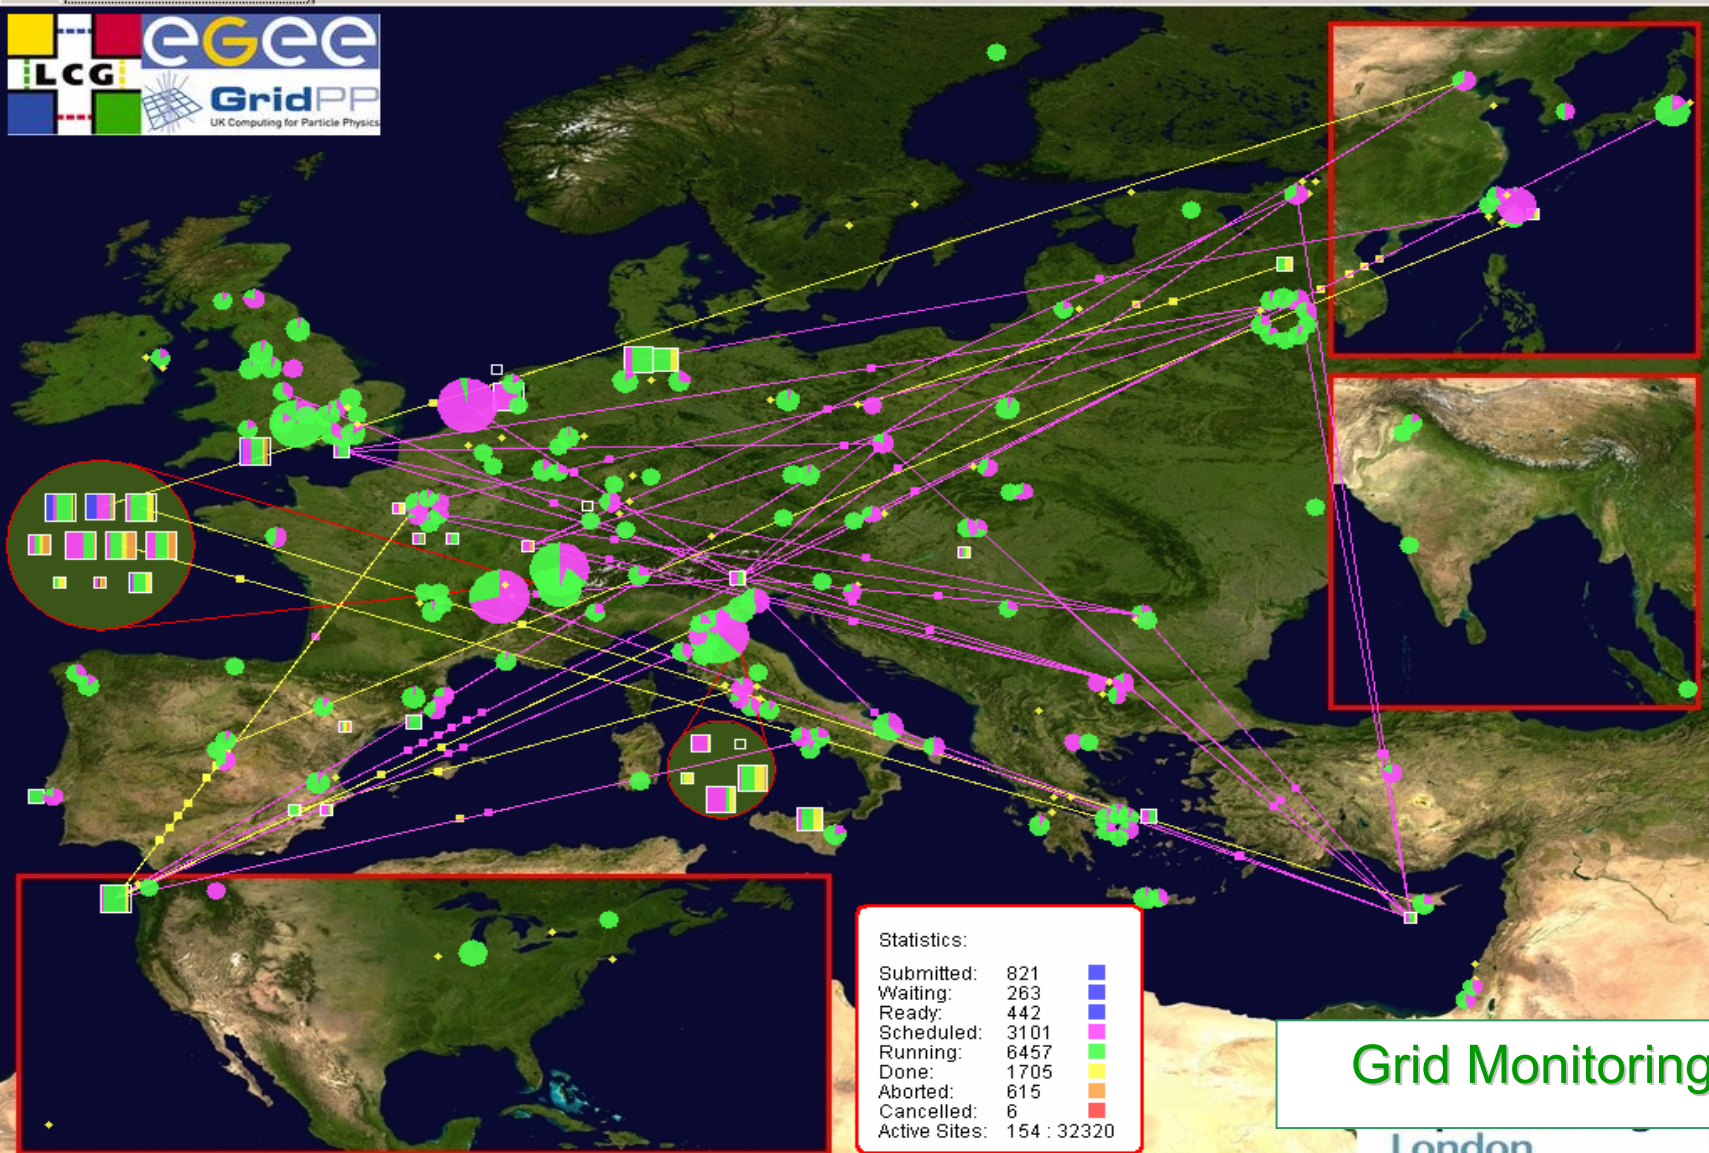

LCG/EGEE Grid infrastructure

Grid Monitor

Tasks: LCG World Real Time Monitor

25 projects have registered as on June 2007

Registered Collaborating Projects

Applications on EGEE

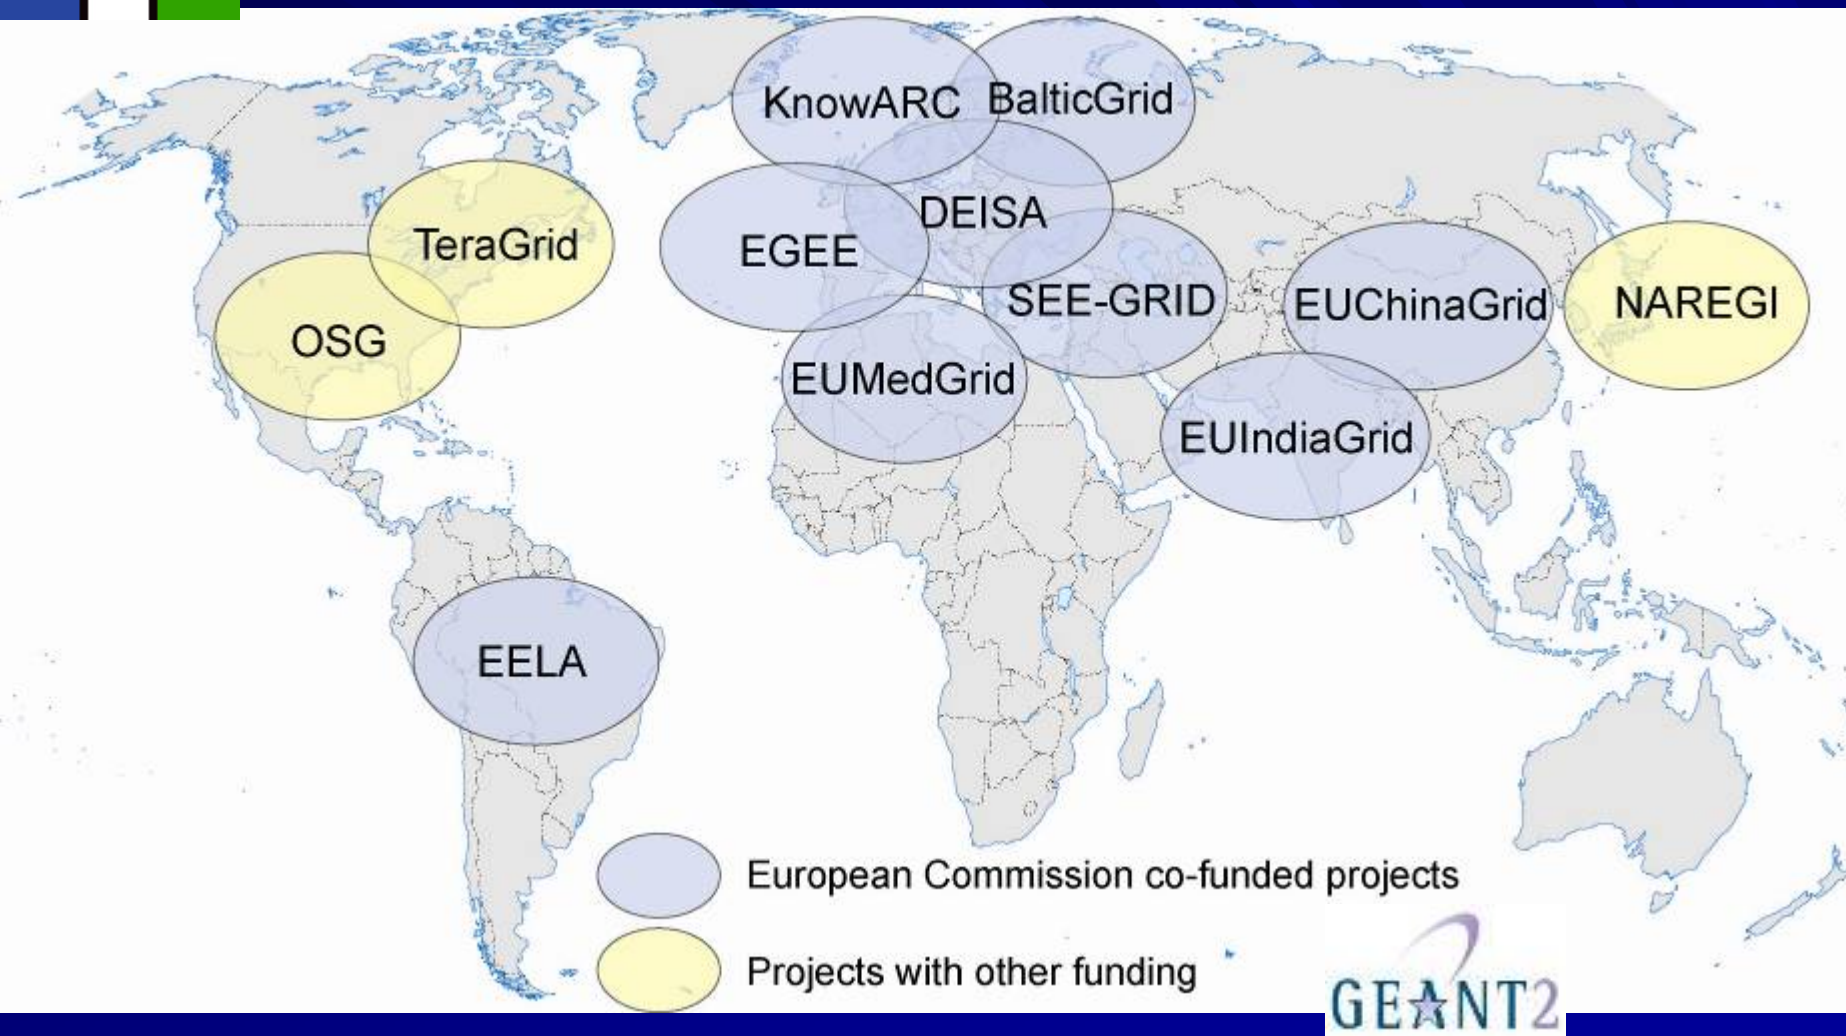

Multitude of applications from a growing number of domains

- Archeology
- Astronomy & Astrophysics
- Civil Protection
- Computational Chemistry
- Earth Sciences
- Financial Simulation
- Fusion
- Geophysics
- High Energy Physics
- Life Sciences
- Multimedia
- Nanomaterials
-

Collaborating e-Infrastructures

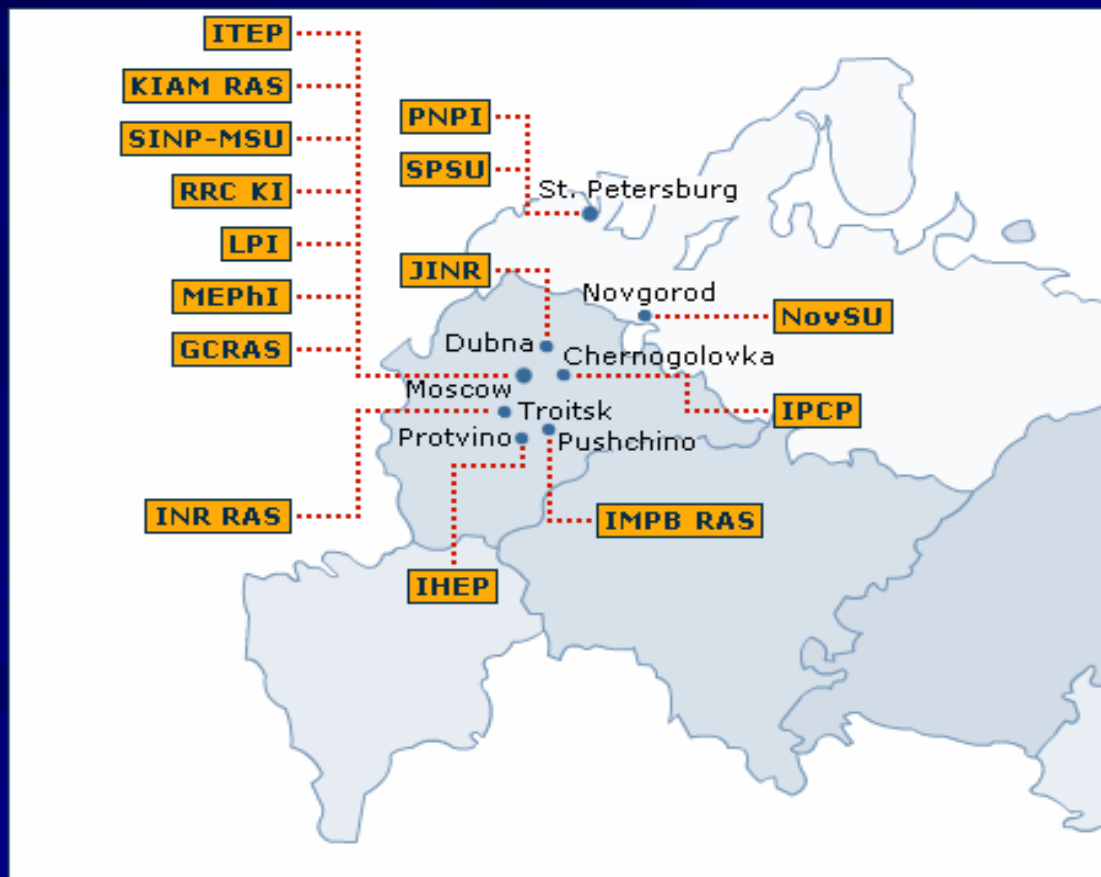

Potential for linking ~80 countries by 2008

JINR in the RDIG infrastructure

Now the RDIG infrastructure comprises 15 Resource Centers with more 1500 CPU and more 650 TB of disc storage.

RDIG Resource Centres:

- ITEP
- JINR-LCG2
- Kharkov-KIPT
- RRC-KI
- RU-Moscow-KIAM
- RU-Phys-SPbSU
- RU-Protvino-IHEP
- RU-SPbSU
- Ru-Troitsk-INR
- ru-IMPB-LCG2
- ru-Moscow-FIAN
- ru-Moscow-GCRAS
- ru-Moscow-MEPHI
- ru-PNPI-LCG2
- ru-Moscow-SINP

RDIG monitoring&accounting

<http://rocmon.jinr.ru:8080>

Monitored values

CPUs - total /working / down/ free / busy

Jobs - running / waiting

Storage space - used / available

Network - Available bandwidth

Accounting values

The XXI International Symposium on Nuclear Electronics and Computing (NEC'2007) Bulgaria, Varna, 10-17 September, 2007.

NEC'2007
XXI International Symposium on Nuclear Electronics and Computing
10-17 September 2007 VARNA BULGARIA

MAIN TOPICS
Detector & Nuclear Electronics
Computer Applications for Measurements and Control in Scientific Research
Triggering and Data Acquisition
Accelerator and Experiment Automation Control Systems
Methods of Experimental Data Analysis
Information and Data Base Systems
Computer Networks for Scientific Research
Data & Storage Management
Grid Computing

PROGRAMME COMMITTEE
F. Buzate (WFPME, Bochum)
S. Cristini (CERN, Geneva)
J. Elias (FNAL, Chicago)
L. Golikova (JINR, Dubna)
H. E. Hoffmann (CERN, Geneva)
V. Ilyin (IHEP SBIS, Moscow)
V. Jovan (JINR, Dubna)
B. Jovan (CERN, Geneva)
M. Khezyakov (Silesia University)
M. Langrock (IP ASC, Prague)
L. Mankov (CERN, Geneva)
B. Mitroshchikov (JINR, Dubna)
J. Nizinski (Cybernet, Krakow)

INRNE

The main topics of the symposium are:

- Detector & Nuclear Electronics
- Computer Applications for Measurement and Control in Scientific Research
- Triggering and Data Acquisition
- Accelerator and Experiment Automation Control Systems
- Methods of Experimental Data Analysis
- Information & Data Base Systems
- Computer Networks for Scientific Research
- Data & Storage Management
- GRID computing

2-nd International Conference "Distributed Computing and Grid-technologies in Science and Education"

LABORATORY OF INFORMATION TECHNOLOGIES
26 - 30 June, 2006

Welcome to GRID'2006!

The **Second International Conference** "Distributed Computing and Grid-technologies in Science and Education" will be held in the **Laboratory of Information Technologies** of the Joint Institute for Nuclear Research on June 26 - 30, 2006 in **Dubna**.

The **First Conference** on this subject was held in the Laboratory of Information Technologies of the Joint Institute for Nuclear Research in June 2004 (<http://lit.jinr.ru/grid2004/>), it was the first conference in Russia devoted to discussion of the issues related to the use of Grid-technologies and distributed computing in science and education.

The **Conference program** will consist of review reports (30 min), oral presentations (15-20 min) and poster reports.

The **working languages** of the Conference are Russian and English.

Registration.
Online registration deadline is **May 25, 2006**.
For those who need visa support - the registration deadline is **April 30, 2006**.

Paper submission.
Participants submitting an abstracts (generated in MS WORD or LaTeX), may send it together with **registration**, or separately by E-mail: grid2006@jinr.ru before **May 25, 2006**.

Conference Venue.
Dubna is a quiet and pleasant town located on the bank of the Tikhvin river. There is convenient **railway** and **bus** connections to the city.

The first conference, organized 2 years ago by LIT, became the first forum in Russia in this field. The second conference was attended by more than **200** specialists from **17** countries and from **46** universities and research centers.

The scientific program included **96** reports covered **8** topics: **1)** creation and operating experience of Grid infrastructures in science and education; **2)** methods and techniques of distributed computing; **3)** distributed processing and data storage; **4)** organization of the network infrastructure for distributed data processing; **5)** algorithms and methods of solving applied problems in distributed computing environments; **6)** theory, models and methods of distributed data processing; **7)** distributed computing within LHC projects and **8)** design techniques and experience of using distributed information Grid systems.

In the framework of the conference two tutorials on Grid systems gLite and NorduGrid were organized.

In general opinion of the conference attendees, such conference should be continued. This will allow one to extend the dialogue of leading experts from Europe, USA and Russia.

**3-nd International Conference
"Distributed Computing and Grid-technologies
in Science and Education"
will be on 30 June – 4 July, 2008**

JINR CICC

	2007	2008	2009	2010
CPU (kSI2K)	670 (1070)	1250	1750	2500
Disk (Tbytes)	100	400	800	1200
Active Tapes (Tbytes)	0	0	100	200

JINR – cooperation in Grid

- Worldwide LHC Computing Grid (WLCG);
- Enabling Grids for E-science (EGEE);
- CERN-INTAS projects;
- **BMBF grant** “Development of the GRID-infrastructure and tools to provide joint investigations performed with participation of JINR and German research centers”
- “Development of Grid segment for the LHC experiments” was supported in frames of JINR-South Africa cooperation agreement in 2006-2007;
- NATO project "DREAMS-ASIA" (Development of gRid EnAbling technology in Medicine&Science for Central ASIA);
- JINR-Romania cooperation Hulubei-Meshcheryakov programme
- LIT team participate in project "SKIF-GRID" - A Program of the Belarussian-Russian Union State.
- We work in close cooperation and provide support to our partners in Ukraine, Belarus, Czech Republic, Romania, Poland, Germany, South Africa, Bulgaria, Armenia, Uzbekistan, Georgia.
- protocols of cooperation with INRNE (Bulgaria), ArmeSfo (Armenia), FZK Karlsruhe GmbH (Germany), Wroclaw University (Poland), IHEPI TSU (Georgia), NC PHEP BSU (Belarus), KFTI NASU (Ukraine), etc
